- Selenium
- WebdriverIO

## Work Experience

NS8, Inc., Las Vegas

July, 2019 – September, 2020

### Junior Developer/SDET

- Worked with ReactJS and TypeScript to create frontend components for E-commerce plugin application
- Created reusable components using ReactJS that were linked from one repository to another
- Implemented unit tests for all components worked on as well as legacy components
- Monitored Lambdas that created switches between E-commerce platform API and NS8's API
- Provided feedback on Pull Requests in Github for better workflow
- Assisted in the implementation of automated testing
- Configured continuous integration using circleCI for better builds and quicker deployments
- Created test servers on AWS's Lightsail service for test environments

## Education

PunchCode, Las Vegas

May, 2019

- A full-time, 12-weeks immersive class that covers career-focused curriculum that provides a foundation of being a Jr. Full Stack Developer.
